## SUMMARY

27 years old with Strong passion for Web-Development.  
Lived in Norway from 1998 til 2006, been in Lebanon since then.  
I like being around like minded people, and learn everything i can from them.

## EXPERIENCE

### Web-Developer, Cloudappers

beirut— 2012-2015

I work on pretty much everything from Front-end to Back-end, API and updating existing projects.

### Accomplishments

- [almoallim.herokuapp.com](http://almoallim.herokuapp.com) did back-end
- [dreamworks-spa.herokuapp.com](http://dreamworks-spa.herokuapp.com) i got the psd and did everything else. website still not released.
- [facebook.com/beitmisk/app\\_575970922475042](https://facebook.com/beitmisk/app_575970922475042) small facebook application for a large real estate company, i got the design and did both front-end and backend.
- [facebook.com/cloudappers.page/app\\_315435858601936](https://facebook.com/cloudappers.page/app_315435858601936) back-end and front-end, promotional facebook app for yoghurt company that lasted a couple of weeks.
- <https://www.dropbox.com/sh/saaomlz1cym5b6i/AACwP8c2vCTwQNzb2u17miTha?dl=0> older project for Coca-Cola Middle-east, got the design, did both front-end back-end. A user uploads an image and gets to see it displayed on a 3D bottle (Note: it was never released because of business agreements with company and Coca Cola)
- [dropbox.com/sh/wshikx5e7la2bqs/AABhax5zFn7AJzDtdvq\\_U9ZKa?dl=0](https://dropbox.com/sh/wshikx5e7la2bqs/AABhax5zFn7AJzDtdvq_U9ZKa?dl=0) API payment integration for a still in development pizza order app
- [dropbox.com/sh/zo6intf5d6u9v4q/AADeg8kXqY9YrexIQTX0WNI3a?dl=0](https://dropbox.com/sh/zo6intf5d6u9v4q/AADeg8kXqY9YrexIQTX0WNI3a?dl=0) did back-end API for an IOS game :)
- [tomandserg.com](http://tomandserg.com) did server administration and some back-end
- [manaihege.com](http://manaihege.com) for a school

## EDUCATION

### Self-tought

— 2011-current(always learning)

Started hacking with javascript, html and css at codeacademy, before moving to python, first through a course made by google, and then on to udacity.com took an intermediate web-development course made by Steve Huffman founder of reddit.

After that i have been working for a company.

## SKILLS

- Back-end as well as Front-end developer
- Python (my favorite)

- Django (almost all projects done for current company are in Django)
- Flask (use it for personal projects)
- HTML, CSS (SASS), Javascript
- nginx, gunicorn, apache
- Postgresql
- django-rest-framework, Tastypie
- Celery
- Linux
- Redis
- Git
- Heroku
- AWS
- Learn and use whatever necessary :)
